

CONDUIT OF OMAHA'S TRADE

Country Merchants Visit Omaha in Quest of Winter Stocks. The increase in the volume of the trade in 1891 has been more regular, and every year since the opening of the year in 1884 there has been a large gain...

SMALL GAIN IN OMAHA BARK CLEARINGS

Jobbers Report in Fair Movement in Goods in Most All Lines, but Collections Rather Slow - Manufacturers Preparing for the State Fair. The man of affairs nowadays, like the successful general, marshals his forces and carries on the battle of trade with the care and calculation of a military leader...

While this is the general situation, there is considerable difference in the reports made by jobbers in different parts of the city. Those who are cutting off a good many of the luxuries of life, and trade on such lines is less brisk than on the so-called necessities. Thus the grocery and the hardware trade are doing better than their business is very good, always taking into consideration, of course, the general situation in the country.

The clearings at Omaha have fallen off during the past week as compared with the previous week. This is due to the fact that the corresponding week of last year has been a gain of 2.2 per cent. When it comes to the volume of clearings, a comparison with the corresponding week of the year 1890 shows that the volume of the trade in the northwest, Minneapolis is about the only city of the northwest that makes a better showing than Omaha in the volume of its trade.

Table with columns: City, 1890, 1891. Rows include Omaha, Minneapolis, St. Paul, Denver, Duluth, Milwaukee, etc.

The completion of the reports of condition of the nation of the United States on July 15, 1891, the date named in the last call of Comptroller Eekels, permits some interesting comparisons in the changes of the financial status of the banks during the period of business depression in the different sections of the country. The complete returns of the eastern states, including New England, New York, New Jersey, Pennsylvania and Maryland, show a decrease in assets most as large as on May 4, 1891, just before the breaking out of the panic, and deposits considerably larger than on that date.

Table with columns: State, Assets, Deposits. Rows include Eastern, Middle, Western, etc.

The fluctuation in the volume of loans and discounts throughout the United States since the date of the report of the Comptroller in the autumn of 1890 is shown in the following table: Loans and discounts, individual deposits, etc.

The receipts of live stock at South Omaha during the week just closed have not been large. At the same time there has been a gain in cattle, but the great trouble has been that they have not been such as to be wanted. Since the reports there have been a good corn-fed native cattle in the market and not many western steers.

Prices on hogs have been steadily advancing during the week and the highest point was reached yesterday. The market was very common and light pigs are coming forward as a result of short feed in the country.

COMMERCIAL AND FINANCIAL

There Were Practically No Deliveries of Corn on September Contracts Yesterday and Consequently Shorts for the Month Were Alarmed. CHICAGO, Sept. 1.—Board of Trade business was rather lighter today and the bearishness was in contemplation of a big rally of prices as a result of the receipts of Tuesday morning.

There were practically no deliveries of corn on September contracts yesterday and consequently shorts for the month were alarmed. The receipts today were rather smaller than estimated at Chicago, and Minneapolis and St. Paul had previously been affected by a few hours, and after going the rounds, it found its way all back to the carriers, who have it sold for December. Trade was estimated to be about 50,000 bushels.
